

C - Bills

Has anyone bothered to show/explain to you what the concerns are with legislation being put forward by the federal government? Well, here are a few:

- ◆ C-9 — criminalizes speech (life max)
- ◆ C-25 — criminalizes political speech year-round
- ◆ C-4 Pt 4 — parties exempt from privacy law
 - ◆ Online Harms 2.0 — pre-crime restrictions coming back
 - ◆ C-22 — location tracking every Canadian
- ◆ C-2 — Canada Post, FINTRAC feeds, cash bans
- ◆ C-12 — mass visa cancellation, foreign data sharing
- ◆ C-8 — secretly turn off your phone, your internet
- ◆ Emergencies Act — freeze your bank
- ◆ C-15 — Bank of Canada controls digital dollars

- ◆ C-18 — Canadians can't share news on Meta
- ◆ C-11 — CRTC regulates streaming and podcasts
- ◆ S-209 — court-ordered blocking of any platform

Now imagine them in tandem:

You say something the Commissioner of Canada Elections calls "false."

- ◆ C-25 makes it criminal. Year-round.
- ◆ C-22's metadata shows where you said it — and to whom.
- ◆ C-2 lets FINTRAC share your financial data with that same Commissioner.
- ◆ C-8 lets the Minister cut off your phone, secretly, during the investigation.
- ◆ The Emergencies Act framework can freeze your bank account.
- ◆ If you referenced a religious text, C-9 charges are available with no AG review.

- ◆ S-209 can block the platform you posted on.

- ◆ C-18 ensures Canadian news about it never reaches Facebook or Instagram.

- ◆ C-12 shares your data with foreign governments.

This isn't Liberal vs Conservative.

It's architecture. 🍁
